Effective Finishing for Aligner Therapy

Save time and money with every finish!

TP Orthodontics introduces the iFinisher™, the most effective appliance for finishing aligner cases. The iFinisher is a single-appliance solution designed for the refinement stage of aligner therapy. With one iFinisher, you may transition your patients to part-time wear, refine without the need to order more trays and do something aligner trays alone cannot - **Promote an ideal occlusion in as little as three weeks.**

Based on the same proven¹ principles of the Original Tooth Positioner invented by TPO® founder Dr. H.D. Kesling over 70 years ago, the iFinisher was developed by Dr. Daniel S. German, D.D.S. specifically for aligner treatment cases to provide a higher quality finish with fewer trays.

The world's smallest finishing appliance, the iFinisher delivers a proven design and comfortable fit that patients welcome, and a convenient, cost-effective, single-appliance solution doctors appreciate. Never before has it been easier or more affordable to consistently achieve a great finish with aligner treatment.

Designed to perform and manufactured to be comfortable, the iFinisher is made from soft crystal-Flex® material with molded airways to create a positive wearing experience.

The iFinisher comes in a variety of colors and may be custom designed to enhance patient acceptance.

TPO LIFETIME WARRANTY

Custom lab appliances are replaced at no charge for any reason other than patient neglect for the entire prescribed wearing time.

"I developed the iFinisher based on a proven method of finishing patients to a higher standard. Since implementing the iFinisher, I have been able to decrease the number of aligners needed while correcting the bite. I am astounded by the speed at which the occlusion improves."

Dr. Daniel S. German, D.D.S., Developer of the iFinisher.

A Single Appliance — Simple, Cost-Effective And Efficient

TREAT THE OCCLUSION

- Correct and relate teeth in both arches simultaneously
- Correct posterior open bite frequently seen in aligner patients
- Promote an ideal occlusion in as little as three weeks
- No need for auxiliaries or composite attachment

REFINE WITH PRECISION

- Close slight spaces
- Correct minor rotations and buccolingual discrepancies

EXCITE YOUR PATIENTS

- **Part-time wear** – The iFinisher achieves results with half the wear-time of aligner trays
- **Less Cost** – Patients order fewer trays and doctors finish in less time than if using aligner trays alone.
- **Quick results** – Compliant patients see results with an iFinisher quicker than if refinement is done with additional aligner trays
- **Comfortable design** – The world's smallest finishing appliance was made for comfort, with specially designed, molded airways and flexible materials.

iFinisher Results

CASE 1

Results after 3 weeks at night

CASE 2

Results after 4 weeks

CASE 3

Results after 8 weeks

Nobody delivers as many proven finishing solutions as TPO - guaranteed. From the Original Tooth Positioner to the Pre-Finisher®, Mini-Positioner™ and the NEW iFinisher, the world's smallest custom finishing appliance, you're sure to get the appliance that is just right for your patients.

Ordering your iFinisher™ is easy! Directly upload your STL or CAD file to TPOrtho.com/labs through **easyrx®** online prescription management system.
